

## How dodgeball is Scientific

Most people think dodgeball is just a fun game. But what would you do if I told you that dodgeball is NOT just a fun game? My name is Meradydd Scott, and I will be telling you fun and scientific facts about dodgeball, proving that it isn't just a game.

First of all, an arm is classified as a third class lever. The muscle would be effort, E, the elbow would be fulcrum, F, and the dodgeball would be load, L. Together they create EFL. EFL is the order of the third class lever.

On September 25, 2012, a record was set for a dodgeball game with the most players by the University of California, with 6,084 players playing.

Imagine that! That is a *lot* of people!
